## Exercise 1: Tool Selection and Implementation

Tool Choice: Jira

Justification:

Jira is selected over Trello because it supports Scrum methodology with advanced features such as sprint planning, backlog management, reporting tools, and integration with GitHub and Slack. It also provides better tracking and visibility for stakeholders.

Project Structure:

Epics:

- User Authentication
- Messaging System
- UI/UX Design
- Notifications

User Stories:

- As a user, I want to create an account
- As a user, I want to send messages
- As a user, I want to receive notifications

Workflow:

To Do → In Progress → Code Review → Testing → Done

Sample Issues (Sprint 1):

- Create login page
- Set up database schema
- Design chat interface
- Implement message sending feature

Reporting Dashboard:

- Sprint progress (burndown chart)
- Task completion rate
- Team workload distribution
- Bug tracking summary

Working Agreements:

- Update task status daily
- Use clear issue descriptions
- Link GitHub commits to Jira issues
- Communicate blockers via Slack
- Complete tasks within sprint deadlines

Exercise 2: Tool Migration Plan

Needs Analysis:

- Require visibility into tasks

- Need centralized task tracking
- Improve communication and reduce meetings

Recommended Tool: Jira

Migration Plan:

Phase 1: Set up Jira project and structure

Phase 2: Import existing tasks from spreadsheets

Phase 3: Train team members

Phase 4: Start using Jira for all new tasks

Workflow Design:

Backlog → To Do → In Progress → Review → Done

30-Day Adoption Plan:

Week 1: Setup and training

Week 2: Migrate tasks and start usage

Week 3: Monitor usage and resolve issues

Week 4: Full adoption and optimization

Success Metrics:

- 90% task tracking in Jira
- Reduced missed deadlines
- Reduced meeting time
- Improved task visibility

#### Change Management:

- Provide training sessions
- Offer continuous support
- Gather feedback from team
- Adjust workflows based on feedback
